OBJECTIVE

Software Engineer with 4+ years of experience designing and delivering backend and cloud-based applications using .NET and C. Experienced in developing RESTful services, implementing secure APIs, and working in Agile environments with Azure DevOps. Strong exposure to Microsoft Azure services including App Services, Azure Functions, Azure SQL, Cosmos DB, and AI-based integrations to enhance application capabilities. Adept at using Python for automation, scripting, and building internal tools and dashboards to reduce manual effort and improve operational efficiency.

TECHNICAL SKILLS

Programming Languages: C, C++, C#, .NET Core (3.1/5/6/7)

Web Technologies: HTML5, CSS3, JavaScript, TypeScript, Angular (12+), React.js, Bootstrap, REST APIs

Frameworks: ASP.NET Core, Entity Framework Core, Web API, WPF, Blazor, SignalR, LINQ

Databases: MS SQL Server (2012-2019), PostgreSQL, MySQL, T-SQL

Cloud & DevOps: Microsoft Azure (App Services, Functions, DevOps), Docker, Kubernetes, Jenkins, CI/CD Pipelines

Reporting: Power BI, SQL Server Reporting Services (SSRS)

Version Control: Git, GitHub, Bitbucket, Team Foundation Server (TFS)

Testing Tools: NUnit, xUnit, Moq, Postman, Swagger

Operating Systems: Windows, Linux, macOS

PROFESSIONAL EXPERIENCE

Sagarsoft Inc. (Client: VendTech International – Savannah, GA)

August 2024 – Present

Software Engineer

- Developed and supported scalable RESTful backend services using .NET Core, focusing on clean architecture and secure design principles.
- Improved PostgreSQL database performance by restructuring schemas, optimizing queries, and applying indexing strategies for multi-tenant environments.
- Implemented backend components deployed on AWS services such as ECS, Lambda, and SQS to support distributed processing.
- Applied OAuth 2.0 and JWT-based authentication mechanisms to protect APIs and enforce access control.
- Streamlined deployment workflows by integrating infrastructure automation using Terraform and GitHub Actions.
- Worked closely with frontend and DevOps teams to ensure reliable service integration and smooth releases.
- Refactored legacy services into modular microservices to improve scalability and maintainability.
- Reduced recurring production issues through proactive monitoring, logging improvements, and root-cause analysis.
- Enhanced onboarding workflows by automating data validation and service provisioning processes.
- Maintained technical documentation for APIs, system workflows, and deployment procedures.
- Environment: .NET Core, PostgreSQL, AWS (ECS, RDS), JetBrains Rider, DataGrip, GitHub, Jira, Slack

Aditya Birla Capital Limited, India

July 2021 – January 2024

.NET Developer

- Built and maintained backend microservices using ASP.NET Core and Azure Functions to support business-critical applications.
- Designed RESTful APIs for multi-tier systems, ensuring secure and efficient data exchange between services.
- Assisted in migrating on-premise applications to Microsoft Azure, improving reliability and reducing infrastructure overhead.
- Implemented CI/CD pipelines using Azure DevOps and Jenkins to automate build, test, and deployment processes.
- Integrated event-driven components using Apache Kafka to enable near real-time data processing.
- Collaborated with UI teams to support React.js-based interfaces and ensure backend compatibility.
- Optimized SQL Server and PostgreSQL queries through query tuning and indexing to improve response times.
- Created reports and dashboards using Power BI and SSRS to support operational and business analysis.

PROJECT HIGHLIGHTS

- Microservices Architecture: Implemented cloud-based microservices on Azure to improve system scalability and ease of maintenance.
- Event-Driven Systems: Utilized Kafka for asynchronous data flow and reliable event processing.
- Cross-Platform Dashboards: Developed responsive dashboards using React.js and Xamarin to improve accessibility.

EDUCATION

- Master's in Computer Science, Rivier University – NH, USA
- Bachelor's in Computer Science, Shreyas Institute of Engineering & Technology – India

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- In Progress: Azure Developer Associate Certification
